

New Feature Announcement

Report Lost / Found Pets Online

We've been heads-down and neck-deep in code again, designing and building a new feature we know homeowners are going to get excited about.

We see it from community-to-community...someone loses a dog or cat, makes a nice flier, and then plasters every light post, pole, and community facility in a two mile radius. Hey...we're not judging...we would do the same if we lost one of our loved ones! We also know that when someone finds a pet, they may not know what to do so they call the local animal shelter and that little loved one may or may not find its way home again. We've got a much better way!

Announcing the ability for homeowners and anyone with access to the website, the ability to submit a Lost or Found report for a pet, complete with pet description, image, contact info, and the ability for the submitter to edit or remove. We've even built a set of components for administrators to manage all submissions to the website. While we would recommend that this new feature is made available to the community without signing in to the website, this plugin can be reserved for homeowner use only.

Lost and Found Pets Display: This control can be added to any page (public or secured) and provides a snapshot view of pets that have recently been added to the website.

Lost and Found Pets Details: This control is used on a page of its own, which allows for a lot more space to provide additional information about the pet.

Lost and Found Pets Entry: This control is used on a page of its own and allows someone to enter the details regarding a pet that has been Lost or Found. As a result of the submission, an email is sent from the website as confirmation and includes a link, for the person who submitted the report, to edit and/or delete the submission.

Lost and Found Pets Administration: We've made it easy for those administering the website to manage submissions sent to the website, so adding, updating, and removing these reports is easy.

The cost of adding this feature to your HOA website is only \$89.95*

Contact us today and let's start helping our little friends!

Play with it today at www.creekbluff.com/plugins.aspx

* One-time setup charge, with no recurring fees whatsoever. Hosting and maintenance fees do not change by adding this feature.

Lost and Found Pets

Display form is configurable and provides high-level info to visitors.

Contact Information

Name: **Hal Abelson**
 Phone: 817-427-8755 (Call or Text)
 Email: bighaltexas@sbcglobal.net

This listing will automatically expire: 12/12/2015 1:46:40 PM

Details display form provides a lot more information about the pet and contact info.

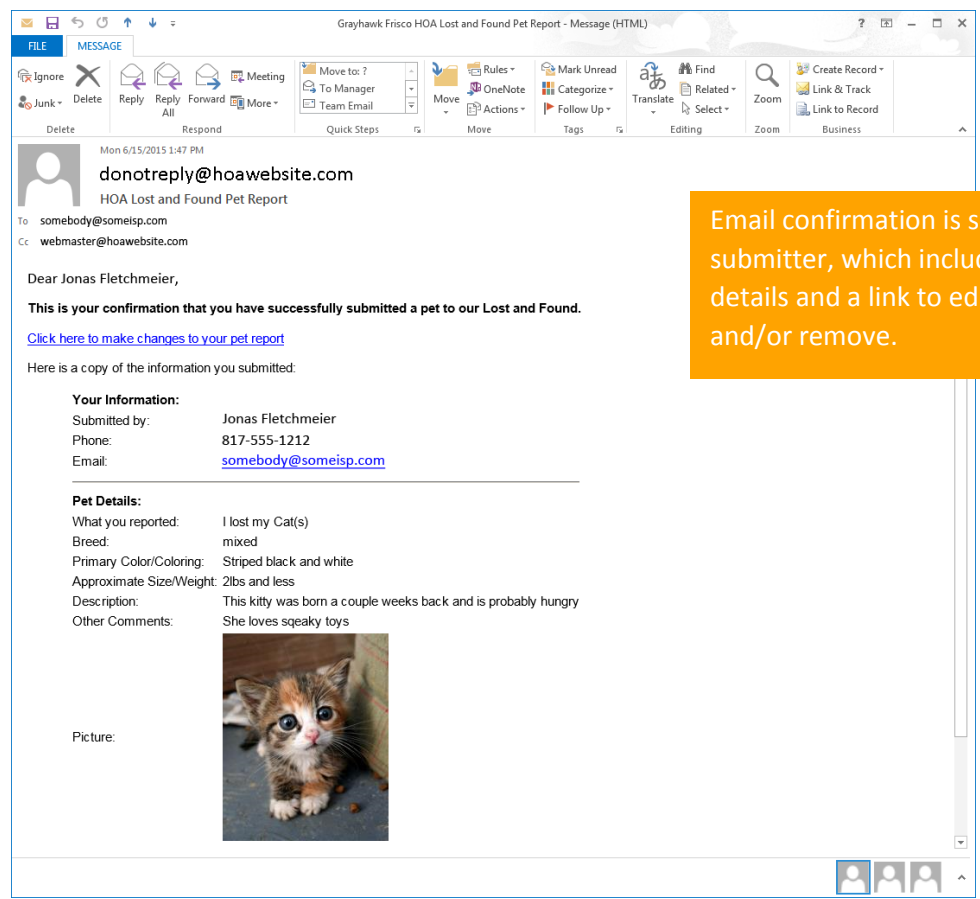

Lost and Found Pets

There are no active pet reports available...and that's a good thing, right!

[Show all pets that have been submitted](#)
[Submit a new pet to Lost and Found](#)

When there are no active Lost or Found pets, the website adapts.

Email confirmation is sent to submitter, which includes all details and a link to edit and/or remove.
